

FAT BOTTOMED BOYS

WE MAKE YOUR ROCKING WORLD GO ROUND!

Dive into the electrifying world of **Fat Bottomed Boys**, the most British of French rock bands, formed in 2020. Their mission? To carry forward the legendary legacy of **Queen** while breathing new life into it through original compositions infused with a royal DNA.

This bold challenge, far from easy, was met with brilliance! The band's five albums — *Let's Do It!* (2020), *Too Much Is Not Enough* (2021), *The King Of Rhye* (2022), *Haters Gonna Hate* (2023), and *Metropolis* (2024) — have been hailed by critics and have won over fans, captivated by this previously unheard-of concept.

Across these albums, Fat Bottomed Boys explore the many facets of rock, from pop rock to progressive rock, hard rock to funk rock, and even new wave, reinventing themselves with every new song.

The band has forged international collaborations, contributing to the soundtrack of the Franco-American film *Borrowed Time 3* and the Australian novel series *The King Of Rhye*.

Above all, their virtual duet with **Freddie Mercury** on the song *New York* in 2021 took the world by storm, leaving an indelible mark in the memories of fans.

Since 2022, **Elash** and **The Sgt.** have been honored as official artists by **Brian May Guitars**, the brand founded by **Queen's** legendary guitarist.

It's during their concerts in France, Belgium, and their international tours — England in 2023, Canada (Quebec and Ontario) in 2024 and 2025 — that the energy of **Fat Bottomed Boys** truly erupts: a powerful sound, flamboyant costumes, and a spectacular stage presence sweep audiences into a whirlwind of emotions, creating an intensely captivating, timeless moment.
